BEEP Lab

McGill

Are you a woman who experiences binge eating?

We are doing a research study at **McGill University** on biology, behaviour, and binge eating in women.

You may be eligible for the study if you are a woman between the ages of 18-60 years and have times when you eat a very large amount of food and feel out of control when eating.

The study involves two lab visits lasting 4-5 and 5 hours, respectively, during which you will be asked to complete clinical interviews and several physiology tasks. You will also be asked to complete online questionnaires from home.

If eligible, you will be paid $200 in return for your participation in all aspects of the study.

To find out if you are likely to be eligible, please take our brief screening questionnaire by following the QR code or contact the **BEEP Lab** at
